**Database Management System**

# Database Management System

# Database Management System

# Database Management System

- **Database:** It refers to a set of related data and the way it is organized.
- Access to this data is usually provided by a "database management system" (DBMS).
- **DBMS:**
  - A set of computer software that allows users to interact with one or more databases
  - Provides access to all of the data contained in the database
  - Although restrictions may exist that limit access to particular data
